

January 27, 2021

The Honorable Chair and Members  
of the Hawai'i Public Utilities Commission  
Kekuanao'a Building, First Floor  
465 South King Street  
Honolulu, Hawai'i 96813

Dear Commissioners:

Subject: Maui Electric Energy Cost Recovery Factor for February 2021

Maui Electric Company, Limited's ("Maui Electric" or "Company") February 2021 Energy Cost Recovery factor for our Maui Division is 14.338 cents per kilowatt-hour ("kWh"), a decrease of 0.629 cents per kWh from last month. A residential customer consuming 500 kWh of electricity will be paying \$153.34, a decrease of \$2.87 compared to rates effective January 1, 2021. The decrease in the typical residential bill is due to the decrease in the Energy Cost Recovery factor (-\$3.15) and decrease in the Purchase Power Adjustment (-\$0.01), partially offset by an increase in the Demand-Side Management Adjustment rate (+\$0.29).

The Company's Maui Division fuel composite cost of generation, central station and other increased 93.130 cents per million BTU to 1,074.61 cents per million BTU. The composite cost of DG energy is 0.00 cents per kWh. The composite cost of purchased energy increased 0.341 cents per kWh to 20.285 cents per kWh.

Maui Electric has determined that the target sales heat rates for Maui Division's industrial fuel and diesel fuel sources will remain unchanged from the target sales heat rates of 0.015786 million BTU per kilowatt-hour for industrial fuel and 0.009938 million BTU per kilowatt-hour for diesel fuel that were in effect at the end of 2020. Attachment 24 provides a calculation of the applicable target sales heat rates for 2021 for each division. As shown in Attachment 24, the Maui Division actual sales heat rates for industrial and diesel fuel in 2020 were higher than the respective target sales heat rates in 2020, resulting in no adjustments to the respective target heat rates that were in effect at the end of 2020.

The Energy Cost Recovery factor for our Lāna'i Division for February 2021 is 20.640 cents per kWh, an increase of 1.142 cents per kWh from last month. A residential customer consuming 400 kWh of electricity will be paying \$152.01, an increase of \$4.57 compared to rates effective January 1, 2021. The increase in the typical residential bill is due to the increase in the Energy Cost Recovery factor.

The Company's Lāna'i Division fuel composite cost of generation, central station and other increased 91.27 cents per million BTU to 1,768.88 cents per million BTU. The composite cost

DG energy is 0.00 cents per kWh. The composite cost of purchased energy is 30.00 cents per kWh.

Maui Electric has determined that the target sales heat rate will change from the target sales heat rates of 0.010872 million BTU per kilowatt-hour to 0.010810 million BTU per kilowatt-hour for Lāna'i Division's diesel fuel. As shown in Attachment 24, the actual sales heat rate for Lāna'i Division's diesel in 2020 was lower than the target sales heat rate for Lāna'i Division's diesel fuel in 2020, resulting in an adjustment to the target heat rate for Lāna'i Division's diesel fuel that was in effect at the end of 2020 to establish the target heat rate for 2021 for diesel fuel. A revised Lāna'i Division ECRC tariff reflecting the revised target sales heat rate for 2021 is included as Attachment 25. A blackline of the Lāna'i Division ECRC tariff is included as Attachment 26. The Company files the Lāna'i Division ECRC tariff sheets in accordance with the Lāna'i Division ECRC tariff, which states:

2. The target heat rates for diesel may be reestablished each calendar year, beginning at January 1, 2020. If the prior year's actual sales heat rate for a fuel type is greater than or equal to the target sales heat rate applicable in that year, the target sales heat rate for that fuel type remains unchanged. If the prior year's actual sales heat rate for a fuel type is less than the target sales heat rate applicable in that year, the target sales heat rate for that fuel type shall be reduced by one-half of the difference between the prior year's actual sales heat rate and the target sales heat rate applicable in that year.<sup>1</sup>

The Energy Cost Recovery factor for our Moloka'i Division for February 2021 is 16.108 cents per kWh, an increase of 1.992 cents per kWh from last month. A residential customer consuming 400 kWh of electricity will be paying \$141.03, an increase of \$7.97 compared to rates effective January 1, 2021. The increase in the typical residential bill is due to the increase in the Energy Cost Recovery.

The Company's Moloka'i Division fuel composite cost of generation, central station and other increased 171.29 cents per million BTU to 1,327.99 cents per million BTU. The composite cost of DG energy is 0.00 cents per kWh. The composite cost of purchased energy is 21.80 cents per kWh.

Maui Electric has determined that the target sales heat rates for Moloka'i Division's diesel fuel source will remain unchanged from the target sales heat rate of 0.011127 million BTU per kilowatt-hour for diesel fuel that was in effect at the end of 2020. As shown in Attachment 24, the actual sales heat rate for diesel fuel in 2020 was higher than the target sales heat rate in 2020, resulting in no adjustments to the Moloka'i Division target heat rate for diesel fuel that was in effect at the end of 2020.

---

<sup>1</sup> See Maui Electric Lāna'i Division ECRC tariff, Revised Sheet No. 88B.

The Honorable Chair and Members  
of the Hawai'i Public Utilities Commission  
January 27, 2021  
Page 3

The attached sheets set forth the fuel adjustment in cents per kWh for each rate schedule that is applicable for pro rata use beginning February 1, 2021.

Sincerely,

/s/ Sharon M. Suzuki  
Sharon M. Suzuki  
President  
Maui County and Hawai'i Island Utilities

## NOTES:

- Col(1): Quarterly FOA reconciliation amounts. (Refer to Attachment 5)  
A positive number is an over-collection. A negative number is an under-collection.
- Col(2): FOA reconciliation adjustment variance accumulated during the last three months, starting with the fourth prior month; the difference between the estimated recorded sales used to derive the \$/kwh adjustment and the actual recorded sales.  
(Col(5) - Col(4))
- Col(3): FOA reconciliation generated in the current quarter. The YTD FOA reconciliation difference minus the adjustment variance. Col(1) - Col(2)
- Col(4): Amount that the FOA reconciliation adjustment is trying to collect. (Col(1) \* 1/3)
- Col(5): Actual collected amount. (recorded sales \* \$/kwh adjustment/1.09751)
- Col(6): Cumulative balance of the FOA reconciliation (Previous balance + Col(3) + Col(5))
