

March 29, 2021

The Honorable Chair and Members  
of the Hawai'i Public Utilities Commission  
Kekuanao'a Building, First Floor  
465 South King Street  
Honolulu, Hawai'i 96813

Dear Commissioners:

Subject: Hawaiian Electric Energy Cost Recovery Factor for April 2021

Hawaiian Electric Company, Inc.'s ("Hawaiian Electric" or "Company") April 2021 Energy Cost Recovery Factor is 11.919 cents per kilowatt-hour ("kWh"), a decrease of 0.385 cents per kWh from last month. A residential customer consuming 500 kWh of electricity will be paying \$145.53, a decrease of \$1.96 compared to rates effective March 1, 2021. The decrease in the residential typical bill is due to a decrease in the Energy Cost Recovery Factor (-\$1.92) and implementation of the Solar Saver Adjustment (-\$0.13), partially offset by an increase in the Purchase Power Adjustment Clause rate (+\$0.09).

The Company's fuel composite cost of major energy increased 91.59 cents per million British thermal units ("BTU") to 1,177.81 cents per million BTU. The Company's composite cost of minor energy decreased 67.308 cents per kWh to (-51.721) cents per kWh. The large decrease in the composite cost of minor energy is due to the retroactive incorporation of the U.S. Federal Alternative Fuels Blenders Tax Credit in the April inventory price of the Schofield Generating Station ("SGS") biodiesel fuel for biodiesel fuel purchases from 2018 through 2020.<sup>1</sup> This reduces the Energy Cost Recovery Factor by about one cent per kWh. The composite cost of purchased energy increased 0.646 cents per kWh to 10.189 cents per kWh.

The attached sheets set forth the energy cost recovery factor in cents per kWh for each rate schedule that is applicable for *pro rata* use beginning April 1, 2021.

Very truly yours,

/s/ Dean K. Matsuura
