Discussion Points:

- In recognizing the importance of identifying individuals for working groups and the commitment of work, a request was made to review working group presentations/reports through the Stakeholder Council due to staffing limitations.
- SC members were advised to allocate resources as they best see fit. The IGP team will try to provide draft materials for review and feedback.

- A more condensed slide deck to assist in the solicitation of work group members will be provided. Additional key points will be lifted from the workplan and IGP process, specific to each work group and a separate message that explains the overall IGP process.
