Customer Registration Process

Hawaiian Electric's Registration Guide for the Customer Interconnection Tool

Hawaiian Electric now offers an electrical application process.

Customers may now submit and manage electrical service request applications online. This quick guide is designed to introduce you to the Customer Interconnection Tool

and highlight key steps so you can confidently get started on the application process.

This guide includes steps on how to:

- Register for an account
- Submit an application for an electrical service

Who can use the portal?

Both customers and contractors can use the portal to create, submit, and manage applications for electrical service requests, such as a new residential or commercial service or an upgrade of an existing service.

Electrical Application Process Overview

What are the steps for the application process?

As you'll see below, the application process often requires some back-and-forth communication between you and our internal teams. The steps for this process include:

1. Initiate and Accept Service Request

During this stage, you will be asked to provide detailed information about your service request. You may need assistance from your electrical contractor or an engineering consultant to provide some of the necessary information and/or documents. After your application has been submitted, our team will perform a completeness review of your application. If required, we may need to perform an additional review. If any required information and/or documents are missed, the application will be sent back to you for resubmittal. Once your application is accepted, a service request notification will be generated and a planner, designer or engineer will be assigned.

2. Develop Conceptual Design and Determine Rough Cost

During this stage, the assigned planner, designer or engineer will perform the necessary research, field inspection and preliminary engineering required to develop a conceptual design. If a preliminary payment is required, a preliminary engineering fee or 20% payment of the rough cost will need to be provided by the customer before the project design and a firm cost estimate can be finalized.

3. Finalize Design and Cost

During this stage, the planner, designer or engineer will develop the final project design and cost estimate. A firm proposal and design drawing will be sent to the customer for a signature of approval and payment.

- 4. Complete Customer Work and Other Requirements During this stage, the customer proceeds with the construction and installation of their facilities and equipment. All necessary inspections will need to be performed and approved by Hawaiian Electric and/or the City & County of Honolulu. Any necessary payments and/or grants of easement will need to be obtained by Hawaiian Electric. After all of the requirements are met, the planner, designer or engineer will prepare and submit the project work order for scheduling.
- 5. Complete Hawaiian Electric Work

During this stage, Hawaiian Electric will schedule the construction and installation of its facilities and equipment. Hawaiian Electric will perform the work, which may take multiple days or multiple phases to complete, depending on the complexity of the project.

6. Energize

During this stage, your project will be energized, at which time your electrical contractor can proceed with the testing of your electrical equipment. Depending on your project, energization will either take place on the same day the Hawaiian Electric work is completed in stage five (5) or at a later scheduled date.

7. Finalize and Close Request

During this stage, your service request will be marked as completed and will be closed in our system.

Once I've started, do I need to finish the entire application at that time?

At any point, you can save your application and come back to it later. You'll also have an opportunity to review everything on the Application Review page before submitting your application to Hawaiian Electric.

How will I know the status of my application?

You will receive email notifications and status updates throughout the application process so it's important to use an accurate email address. The email address used for signing up should be the same as the one used in your application so you can stay informed on the status of your application.

Why is the application process changing?

This new application process through Hawaiian Electric's Customer Interconnection Tool helps to more efficiently move the entire project along while giving key stakeholders updates throughout the process.

Where can I go if I have more questions or need help?
