# Making Amendments in the Customer Interconnection Tool (CIT)

## TABLE OF CONTENTS

- Initiating an Amendment/Battery Bonus/BYOD Application........................page 2 - 3
- Contact Information:
  - How to document Property Owner changes..................................................page 4
- Amendment Submission.......................................................................................page 5
If you have an existing Solar Agreement with Hawaiian Electric, you can submit Amendments, including Battery Bonus or BYOD Applications, through the Customer Interconnection Tool. You can document equipment additions, removals and replacements.

**Initiating an Amendment/Battery Bonus/BOYD Application**

To Create an Amendment/Battery Bonus/BOYD Application:

1. Log in to the Customer Interconnection Tool
2. Select “Start a New Renewable Energy Program Application”
3. Select the **AMEND** option, and then choose either the Battery Bonus, BYOD, or Equipment Change sub-option. If BYOD is selected, please be sure to select the BYOD level as well.
How to document System Owner changes:

1. If the system is not leased but the system owner has changed as a result of the property owner changing, then update the property owner section with the new owner information.

2. If the system is leased, select yes and fill in the new system owner(s). This can include lease transfers from previous property owners, lease buyouts, or new leasing companies.

3. If part of the system is owned by a leasing company, and part is owned by the property owner, it will be necessary to list both the leasing company and property owner as system owners, with descriptions of what portion is owned by each.

4. If multiple leasing companies each own a portion of the system, they should all be listed.
**Amendment Submission**

1. You can indicate your system change by adding and/or removing equipment. You can also choose No Change if there are no system changes.

2. Once you click on Add/Remove additional fields will display and you have the option to add/remove Inverter, PV Panel, Energy Storage.
