Savings on Electricity Mean More Funds for Patient Care.

Shriners Hospitals for Children® – Honolulu is the first healthcare facility in the state to enroll in Hawaiian Electric Company’s energy-saving program, Fast DR (Demand Response). Organizations that qualify will receive $3,000+ in electricity credits per year. To sign up, call 94-POWER (947-6937) or visit dr.heco.com.

“This program will help reduce our energy costs, so that more funds can go directly to caring for our young patients.”
